

SENSAI

Certificate

SensAI Academy hereby certifies that

Marcin Olszewski

has successfully completed the AI Agents Expert program, demonstrating proficiency in designing, building, and deploying autonomous AI agents powered by large language models.

The participant is capable of creating end-to-end agent systems - from designing perception, planning, action, and memory modules, through implementing tools (Tool Calling, MCP), RAG systems with vector databases, and browser automation, to building multi-agent architectures with orchestration and handoff. They possess competencies in AI agent security (prompt injection defense, access control, AI Act compliance), LLM evaluation, and operational cost optimization — leveraging tools such as n8n, LangGraph, OpenAI Agent Builder, and OpenRouter.
